Commendation Letter

To: Ray of Joy Speech Therapy

Dear Joan and Ray of Joy Speech Therapy Team,

We would like to formally commend Ray of Joy Speech Therapy for your meaningful and thoughtful collaboration with Pre-School By-The-Park in supporting the assessment of all our Nursery 2 children.

This partnership reflects our shared commitment to understanding children deeply and responding intentionally to their unique strengths and emerging needs. From the outset of our collaboration in April/May 2025, your team took time to understand our school's context, priorities, and hopes for our N2 cohort. This ensured that the screening programme was not a generic service, but one thoughtfully designed to align with our educational philosophy and goals.

We greatly appreciated the care taken to support clear and reassuring communication with both parents and educators before and after the screenings. The parent and educator FAQs, along with your responsiveness and clarity, helped families and teachers feel informed, confident, and at ease throughout the process.

In July 2025, Ray of Joy screened all our centres N2 children using a play-based approach with the PLS-5 Screening Test. The sessions felt natural and child-friendly, allowing each child to engage comfortably and authentically. We were particularly impressed by the personalised reports provided for every child—accessible to both parents and educators, and written with sensitivity and clarity. These reports not only highlighted areas for growth, but also honoured each child's strengths and offered practical, actionable strategies.

For children identified as at-risk, the clear and well-organised dashboard enabled our team to follow up efficiently and purposefully. The digital delivery of reports and the offer of complimentary 15-minute phone consultations for families further demonstrated your commitment to accessible, family-centred support.

Beyond the screenings, your follow-up consultations and educator training were invaluable. Because your therapist had spent time getting to know every child, discussions were grounded in real observations rather than abstract theory. Educators felt safe and supported asking specific questions about individual children and received practical strategies they could confidently implement in their classrooms. The training session and take-home reference sheet further empowered our teaching team to identify and support children with communication difficulties.

Educators shared that the process increased their confidence in advocating for further support when needed. It also brought attention to children with milder needs—children who might otherwise have gone unnoticed—and encouraged proactive monitoring. The whole-class strategies you proposed were welcomed as manageable, thoughtful approaches that supported all children without singling anyone out.

What stood out most was your sensitivity to the educator experience. The consultations felt collaborative, relevant, and grounded in the realities of everyday classroom practice. Your years of experience working alongside educators were evident in how respectfully and thoughtfully the programme was carried out.

We commend Ray of Joy Speech Therapy for designing and delivering a programme that truly felt like a natural extension of our school's work, rather than a one-size-fits-all intervention. Your partnership has strengthened our collective understanding of children's abilities and reaffirmed our commitment to honouring children's voices and developmental journeys.

With sincere appreciation,

Loy Wee Mee
Director
